

SUCCESSFUL 3-DAY MOBILITY EVENT IN PORTO

Porto, April 2024 - The 'Social Tailoring' project recently held an impactful 3-day mobility event in Porto, bringing together all partners from the consortium to collaborate on maximizing motivation in order to enhance the skills of individuals facing situations of disadvantage.

The primary objective of the project is to empower individuals excluded from the labour market by providing them with the necessary tools and skills to enhance their employability and overall well-being. Through innovative and tailor-made programs, the project aims to support these individuals in achieving personal and professional growth as well as their reintegration in the field of fair trade textiles.

During the 3-day mobility event in Porto, partners worked closely together, exchanging knowledge and experiences in the field of tailoring, ethical trade and the development of personal motivation activities.

The Erasmus+ Social Tailoring project will continue with additional activities and meetings in the coming months, with the aim of further boosting professional skills development and fostering social and labour integration.
